

Dear FCC:

I would like to oppose your replacing or taking priority over current FM translator services. This would greatly effect my ability to listen to some of my helpful and favorite stations like K-LOVE radio. K-LOVE serves me in my local community to listen to educational and religious broadcasting without subscribing to advertising. It also encourages my family and I and is a positive radio station I don't have to worry about my kids listening to. If K-LOVE were displaced by an LPFM, my family would be impacted by having less of a choice to listen to positive, wholesome music and commentary. I believe maintaining current FM translators and stations like K-LOVE is in the public's best interest as it gives a wider variety of programing and informatoin than LPFMs ever will. Please reconsider your curent proposals to displace current FM translators. Thank you.

Sincerely,

Mike Everson
